

The Institute for Sustainable Economy and Community
Implementing Innovative and Motivating Response to Over-Critical Needs

The Pod People

We need your immediate financial and personal assistance TODAY.

We need money to finish the assembly of the Pods that we want to send into the hands of waiting people and bona fide, accredited, proven, validated agencies working on the ground in not just one but several critical locations around the world. This is not just about some water here, a little power there, or the occasional ad hoc monitoring of health, food, nutrients. It's not just about a web link here or there.

This is about answering some comprehensive and burning needs that have big impact factors for those of you living in – well, to be frank – Planet Earth. But particularly those of you who are sitting in the USA, Canada, Europe, Australia, Russia, and other countries and who have the means to send anything from \$5 to \$5M. The EcoOasis Pods are also about global conflict and warfare and terrorism. George W. Bush and his ilk did not want to hear about this, as an alternative to dropping bombs and firing missiles. The same seems to be the case for a few other countries and politicians. But it is simple common sense, 4th grade level, to understand that by putting a Pod in places like sub-Saharan Africa, in Palestine, in the Gaza Strip, in Colombia, in “hot zones” throughout the world, you with your \$5 or \$500 or more are helping to simultaneously provide:

not only a font of drinking water for a village or small town, complete,
not only electricity and some mechanics for driving grinders, saws, and other tools,
not only a great health monitoring waystation,
not only a 7x24 live internet education center,
not only portable emergency shelter structures
not only environmental testing for dangerous compounds in the soil, water and air,

but also

Microeconomic Opportunities, Initiatives, and Self-starters
for People, for Kids, for All People

and that also means

You are concretely, sensibly, practically, rationally, economically helping to reduce the incentives for:

child slavery
child soldiers
terrorism and warfare and more terrorism and more warfare

Each Pod has a variable cost depending upon what specific pieces of gear go into it. Right now we want to send Pods to Palestine, Kenya, Mali, Nigeria, and Colombia. These are not communities that can pay for these Pods. We need approx. \$100,000 per Pod for everything including shipment and setup. So we need you to help with \$500,000, in whatever ways you can.

Institute for Sustainable Economy and Community (ISEC) – We Need YOUR Help Today

This is not much! \$500K is the cost of one piece-of-junk that FEMA buys from a Fortune 200 company for a measly 5,000 gallons of water production per day – and nothing else! We know how to do things sensibly and economically, from the science to the general ledger.

Yes, these are hard and difficult economic times. But anyone reading this can surely support with \$5 or \$10 at least. Most of you can give \$50 or \$100. A large number of you can spare \$1,000 or more, because you have it, and maybe you are giving it to other charities – but what are they doing with it that is going to impact so many people so many ways, so definitely and clearly and quickly?

Some of you can spare \$100,000 or more. You have or control foundations, and you probably haven't heard about EcOasis yet because of "gatekeepers" who sort and filter your mail. I hope that you are getting this information because it's what you say you want, left and right, over the media and in your interviews.

Every little bit helps. 1,000 of you giving \$50 each enables us to finish two Pods enough that we are sure that by taking them around, with our own trucks, our own staff, our own money, we will get the rest that is needed for delivering these overseas.

And don't forget – the Pods are also for "your backyard and neighborhood." When there is a need. Tornado, hurricane, flood, forest fire, earthquake, chemical spill. Every one of you knows someone who has lived through one of those. The Pods make life easier and help normal life to come together easier and faster.

Just print out the next page and Do Something, TODAY. We don't need more talky-talky-talk across the Net, on TV. We are all sick and tired of pundits in Washington and wherever, getting on TV, on their web soapbox, or wherever, spouting profundities about the world's problems and how to solve them. There are a ton of non-profit agencies around the world and especially in the USA taking your hard-earned money and doing nothing but feed themselves and generate PR and marketing campaigns in order to raise more money to do the same. There are also many who are doing good things but much of that is stop-gap, short-term, temporary. Do something now, here, that will have a Lasting improvement on the people that get to use the Pod.

MY PLEDGE TOWARDS A POD FOR PEOPLE

I support the mission of the **Institute for Sustainable Economy and Community** and hereby express my intention to support that work in the following manner.

[Please check one or more of the following]

_____ I am making a contribution in the amount of \$ _____, payable to **Institute for Sustainable Economy and Community**.

_____ I am making a Pledge to contribute the amount of \$ _____ by the date of (mm/dd/yyyy) ____/____/____.

_____ I intend to contribute financial support of at least \$ _____ by the date of (mm/dd/yyyy) ____/____/____.

_____ I am contributing in-kind support, in the form of _____ and pledge to duly transfer title or convey licensing or otherwise grant ownership or use, according to specific provisions of my choice and determination, in order that the Institute may benefit from this resource/asset for conducting its work.

_____ I commit to making a contribution of volunteer support in the form of labor dedicated to Institute business, commencing on or about the date of (mm/dd/yyyy) ____/____/____, with an expectation of dedicating approximately _____ hours per _____ (week/month) for a minimum of _____ months.

It is my understanding and expectation that the Institute will employ these resources and contributions for the work of delivery EcOasis Pod systems to agencies and organizations operating in a variety of locations worldwide where there is need for fresh water, power, communications, environmental analysis and healthcare support, such as may be provided through the devices, systems and supplies of the Pod units. I am aware that as of the present date, the Institute is currently in the process of receiving IRS 501c(3) status as a non-profit corporation and that while tax-deductible status is expected to qualify for any of my present or future contribution(s) there is no guarantee that the IRS status will be granted. I also understand that there are no indicators to the contrary for the Institute receiving such status in prompt and timely fashion. I further understand that any pledge for future contributions, as stated above, is not legally binding upon myself and that I may withdraw my pledge without legal consequences. Lastly, I understand that any present and immediate contribution will be deposited into a bank account administered by the Institute and that I may withdraw my contribution for up to a period of 10 business days from the date of this letter.

Sincerely,

[Signature] _____
